

VISION

VISION TO REALITY

Digital Asset Suite

“...technology is evolving at a rapid pace and 2018 will be the year that **blockchain**, the backbone behind cryptocurrencies, establishes itself as the **fastest-growing digital technology** since the evolution of the internet...with Blockchain technology migrating from early adopter status to **mainstream adoption**, Researchers recently found that the global blockchain market could surpass **\$3.1 Trillion by 2030**”

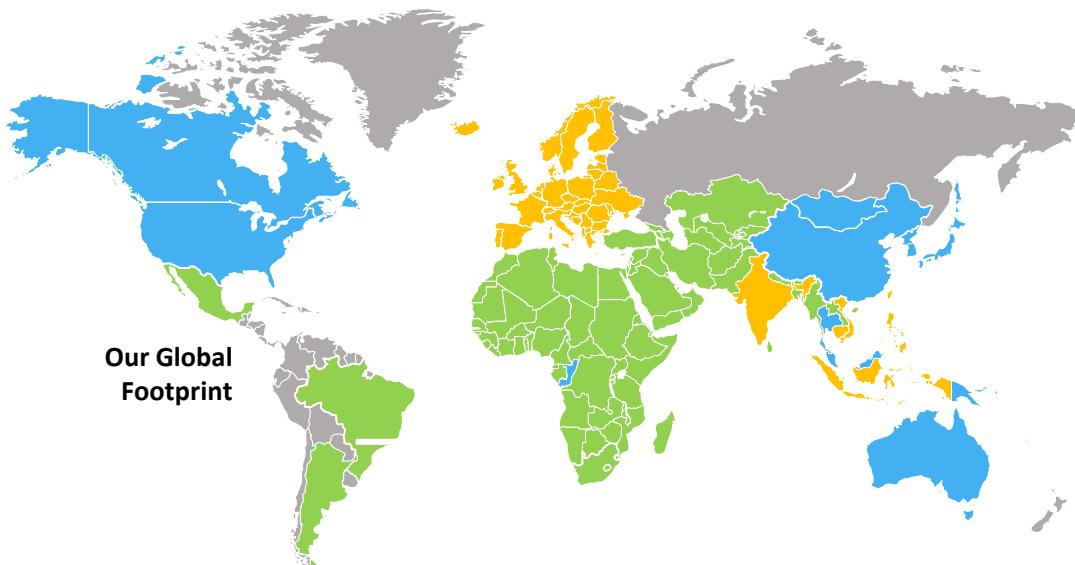

—

Forbes

VisionTech – Innovation-As-A-Service (IAAS)

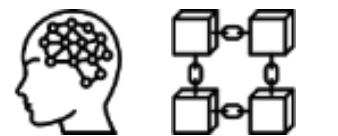

Global technology enabler focused on driving adoption of AI, Blockchain and Cybersecurity for our clients by making it better, faster and easier.

Vision	Mission	Values
To be the most valuable technology group by empowering our stakeholders to turn their vision to reality and to use technology for the betterment of the human race	Empowering our stakeholders to turn their Vision to Reality	Impact, Integrity, Inclusive, Innovation, Independence, Interdependence
Established:	2018	
Business Scope:	Innovation-As-A-Service (IAAS), future-proofing companies for the future	
Operations:	More than 60 professionals (including regional ecosystem partners)	
Locations:	Clientele primarily around Asia (>9 countries), with plans for global expansion	

Our Global Footprint

Our Leading Edge Technologies

Our Key Stakeholders

Advisors, Team, Ecosystem Partners

**Khoon Hong Lim**

Former Board Member and President Asia Pacific in Wincor Nixdorf which was the top 2 technology providers in the world for retail and banking IT. One of the first Singaporeans that sat on the Board of a large German listed MNC.

**Andreas Weigend**

Former Chief Scientist of Amazon and worked with clients from Alibaba, Mastercard, Thomas Reuters, Goldman Sachs, Singtel, SAP, WEF and more. Has a PhD Physics from Stanford.

**Ryan Wong**

Over 28 years experience in tech and cybersecurity space.
Serial Entrepreneur and senior technology advisor to various organisations around the region.

**Lim Hui Jie**

Serial entrepreneur with extensive business experience and as the CEO, listed his company at over USD\$230million before the age of 30 years old.

**Mike Chua**

Over 25 years of technological experience, previously focusing on strategy and operations in Asia's largest technology services company, specializing in commercial and financial sectors.

**Philip Wong**

Technology advocate who believes strongly in innovation and doing things different, having founded several companies around the region including Singapore and China.

**Andrew Hobson**

Primarily focused on delivering ground breaking and outcome orientated products for our clients. Previously Global Head of Architecture & Strategy at HSBC and Global Head of Data Transformation at Standard Chartered Bank.

**Aaron Gong**

Extensive experience in delivering solutions with a little technical debt as possible. Domains worked on include crypto currency, auto trader, data management products for FIs, IoT (Environmental monitoring) and Fleet Management

**Jonathan Oh**

Creative and persuasive individual with extensive knowledge of current market conditions and innate ability to identify opportunities in the market.

**Tristan Lim**

Dedicated and intuitive individual, and a strong sense of purpose to bring value to the table, successfully impacted across multiple industries in the last 10 years, from Operations to Business Development.

**Evelyn Tew**

An experienced project manager in the technology sector, aided by her strong background in Software engineering that enables her to function as an intermediary between various parties.

**Cece Lu**

Armed with an abundance of project management experience, it has enabled her to execute numerous projects effectively and efficiently, from successfully managing projects for mobile apps to integral stakeholder development within China and Singapore.

**Janna**

Over 9 years of software testing experience in various industries (Banking, FMCG, and Insurance companies). Core strengths include hands-on test execution, results gathering and defect management.

**Janice**

Over 20 years experience in Admin and HR and assist in overseeing the company day to day operations.

**Anis**

NUS Graduate and specializes in Leadership and Human Capital Management. Her constant involvement in community service has inspired her to pursue a career in HR. Always looking for strategic and innovative ways to contribute value to the organization.

**Suzie**

Over 20 years in Finance, adept in leading and developing international groups to support the entire group in the areas of finance, business planning, budgeting, system implementation.

**Joshua Ong**

Managing partner of Baker Tilly and he leads the Capital Markets and IPO services. More than 20 years' audit, consulting and commercial financial control and accounting experience, including more than 10 in international accounting firms.

**Vincent Choy**

Over 12 years experience in oil and gas and event industry. Serial Entrepreneur who is a passionate advocate for blockchain technology.

Products and Services

Insights

Insights-As-A-Service

A **Data Decisioning Tool** that empowers organisations to efficiently and accurately make sense and manage their data landscape.

- ✓ Lightweight
- ✓ Rapid deployment
- ✓ Use real data instead of metadata
- ✓ Near real-time
- ✓ Machine learning
- ✓ Data visualization and analytics

Protocol

Blockchain Anything

A proprietary blockchain solution built upon a **Permisioned / Permissionless Hybridization model** allowing applications to be built on a platform which adopts an API first methodology.

- ✓ Immutability of records
- ✓ Traceability
- ✓ High scalability & speed
- ✓ Low transaction cost
- ✓ Fractionized distributed storage

Vanguard

Blockchain-As-A-Service

A solution offering comprising of three main products, **eSecure**, **ePro** and **eBiz** to improve cybersecurity, workplace productivity and drive sales through digital transformation.

- ✓ Workflow engine
- ✓ Identity
- ✓ Lightweight, modular and high performance
- ✓ Smart contract enabled

Consultancy

Digital Transformation Advisory

Vision Digital Transformation Advisory aims to drive the adoption of technology by traditional businesses to improve productivity, drive sales and lower costs.

Digital Assets Advisory

Vision Digital Assets Advisory is a one stop solution for organizations interested in conducting an ICO/STO/IEO/ITO.

Audit

Cybersecurity Audit Support

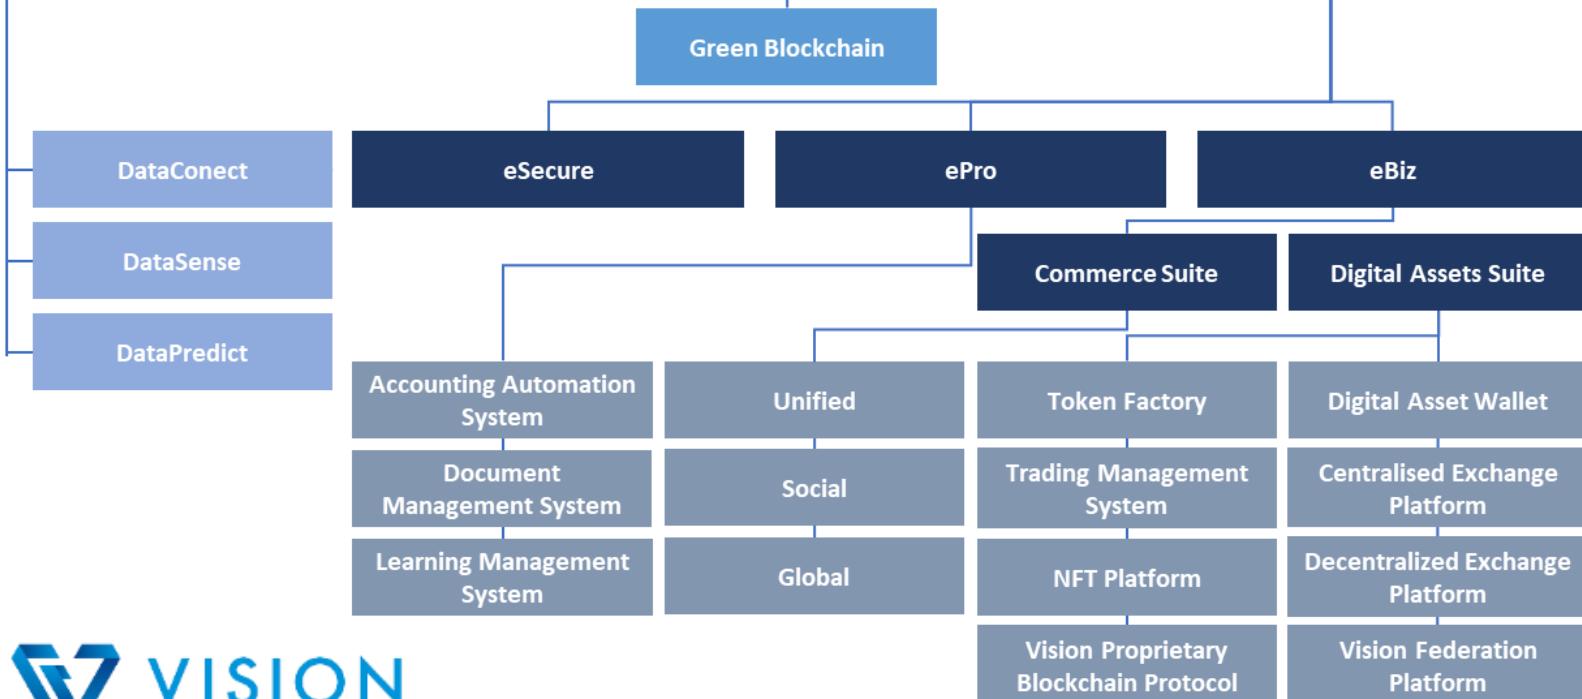

Vision Cybersecurity Audit Support taps into Vision's experience in Governance and Risk Management to provide cybersecurity audit solutions and services to protect your organization with a focus on VAPT.

Digital Assets Audit Support

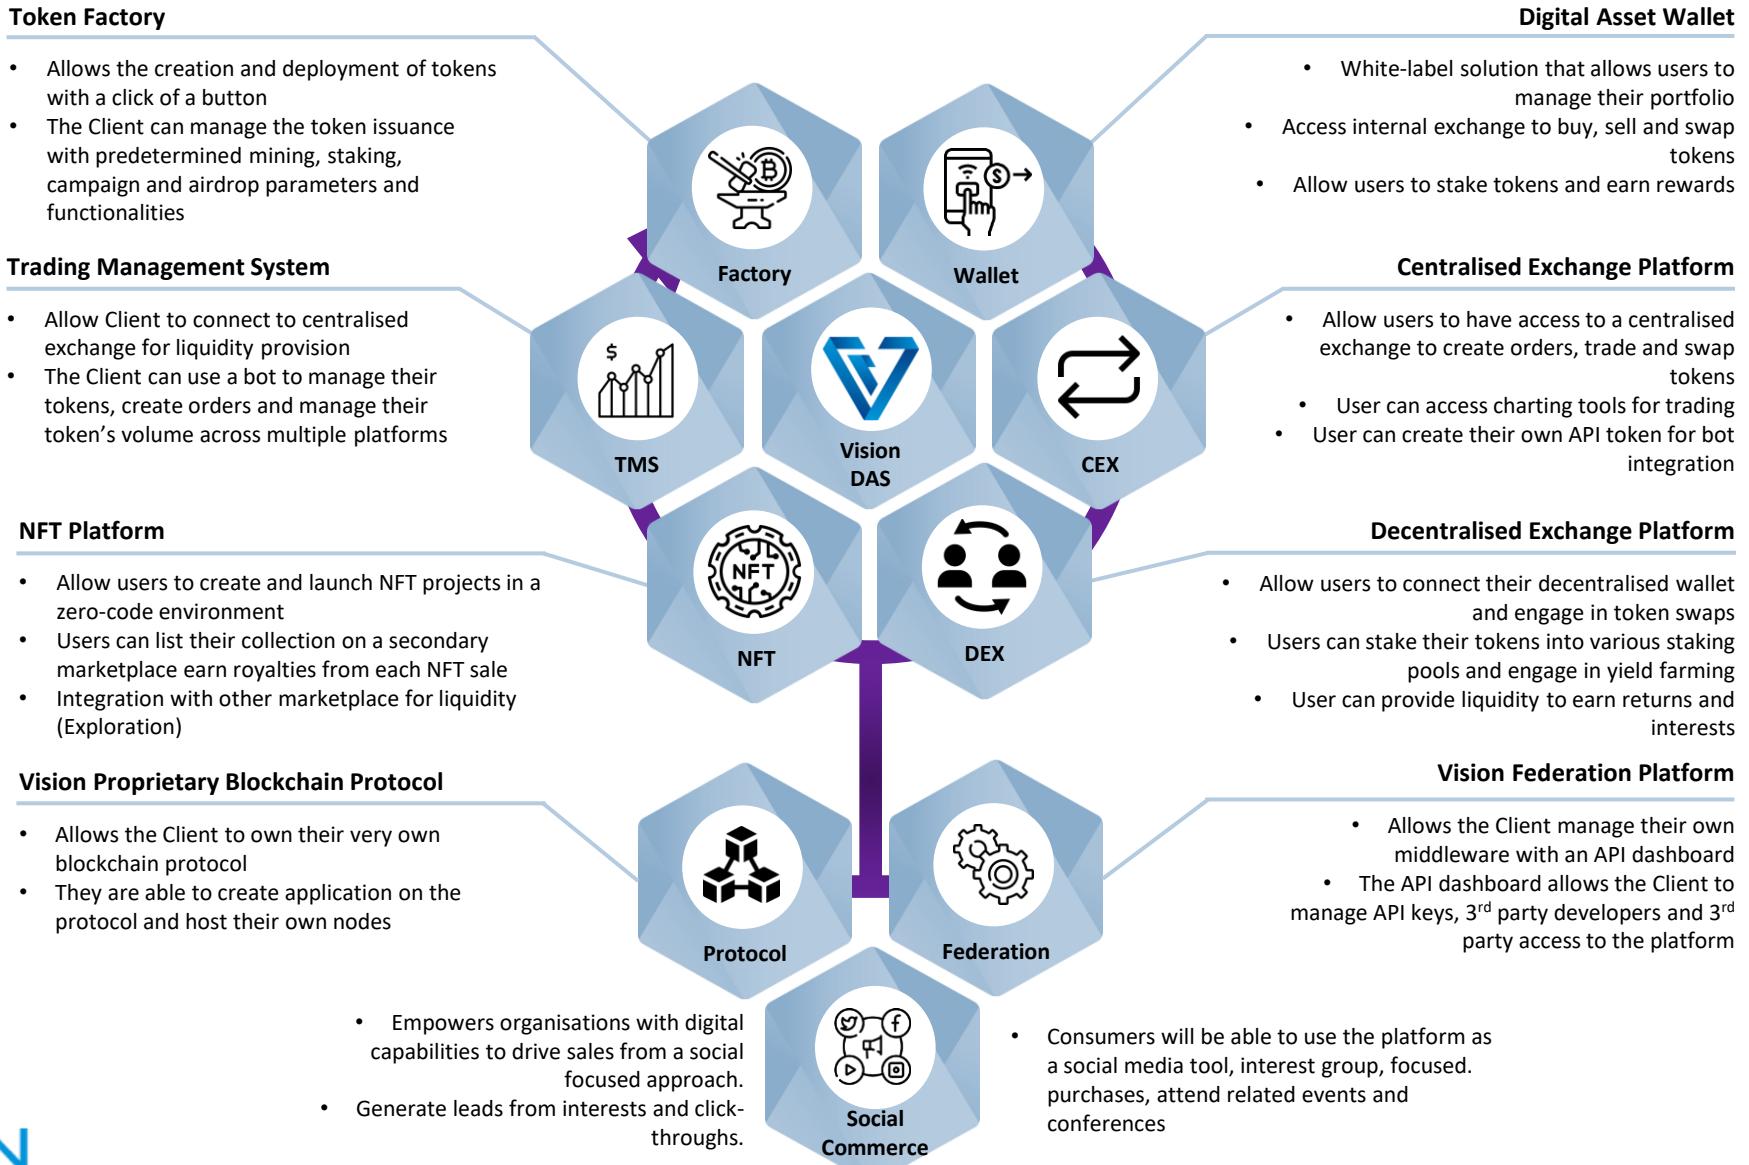

Vision Digital Assets Audit Support provides digital assets audit solutions and services to protect your organization with a focus on business processes, proof of ownership/assets, merkle tree test, VAPT, smart contract audits.

Hosting/Maintenance/Support

Outsourcing

Digital Asset Suite

A photograph of a dense, dark forest with tall, thin trees. In the foreground, there's a rocky stream bed with moss-covered rocks. Several bright, glowing blue lines of varying thicknesses are overlaid on the image, creating a sense of depth and light. One line starts from the bottom right and curves upwards towards the center. Another line originates from the top left and extends towards the center. A third line is positioned vertically on the right side.

PART 1

Use Cases

What is a NFT

A non-fungible token (NFT) is a unique and non-interchangeable unit of data stored on a digital ledger. NFTs can be used to represent easily-reproducible items such as photos, videos, audio, and other types of digital files as unique items, and use blockchain technology to establish a verified and public proof of ownership.

NFTs - Beyond Just Digital Representation

Representation
and redemption of
physical goods

Unlocking of
premium digital
content

Access to unique
premium
experiences

Use Case 1

Redeemable NFTs

Rebirth NFT Collection

Whisky redeemable NFT collection of 4000 where every single NFT is backed by a physical bottle of whisky that owners can redeem.

The NFT also represents membership that allows exclusive access to both real-life and metaverse events into the future.

Exclusive private party for NFT holders with a set of 8 NFTs.

Baby Prototypes born on the Reveal Day
NFT Holder secures a bottle worth of Ceilihs whisky sitting in a cask in Scotland after buying NFT

The prototype is enhanced when exposed to The Spirit
The whisky sits in the cask as it ages, appreciates in value until it is redeemed

The Prototype transforms into an ascended or corrupt angel
The art transforms into the final phase when the whisky is redeemed. The Ceilihs whisky is bottled and sent to the owner

Use Case 2

Unlocking Premium Digital Content

Punks Comic

Unlock an actual comic issue where users can read when they purchase a punks comic.

Redeem physical copy of comic issue which comes with a special case and serialised certificate of authenticity.

Unlock future rewards and NFT releases where users are able to use the NFTs in the metaverse games as characters or items.

Use Case 3

Governance

DAO NFTs

A DAO is an organization run by a group of people with no typical company hierarchy, who establish their own rules, and make decisions based on smart contracts on a blockchain. All its rules and transactions are recorded on the blockchain, thereby removing the need for any central entity.

Allow a group of people to collectively own a high-value NFT without shelling out thousands of dollars.

Allow the community to have partial ownership of the organisation, allowing them to decide on the direction of the organisation and vote on changes and implementations within the entity.

Pixel Vault Founder's DAO (~4 ETH)

Use Case 4

Fan Engagement for Celebrities

NFT Platform for Celebrities

A NFT marketplace platform where superfans can buy access to future rare experiences with their favourite creators and celebrities, both offline and in the Metaverse.

NFTs sold by celebrities are access tickets to one-of-a-kind perks for fans, including creative or business collaborations, adventures, one-on-one hanging out, mentorship and a lot more.

Creators can have their own storefronts and design the NFTs with any kind of unique access or perks.

Discover and own
experiences with your
favorite creators

 Wendy Sulca Singer Coming Soon	 Danish Ali Comedian Coming Soon	 Bernard Hiller Hollywood Coach Coming Soon	 Voice Over Man YouTube Star & Director Coming Soon

Use Case 5

Play-to-Earn Games

NFTs as In-Game Items

For many projects, NFTs are the first step into the world of metaverse gaming where essentially any in-game items can be made as an NFT, even land.

This allows a free market trading of NFTs to take place where users are able to buy and sell these NFTs on an open marketplace.

It gives the players control of their own virtual assets and allow them to use these assets to potentially earn through playing.

Use Case 6

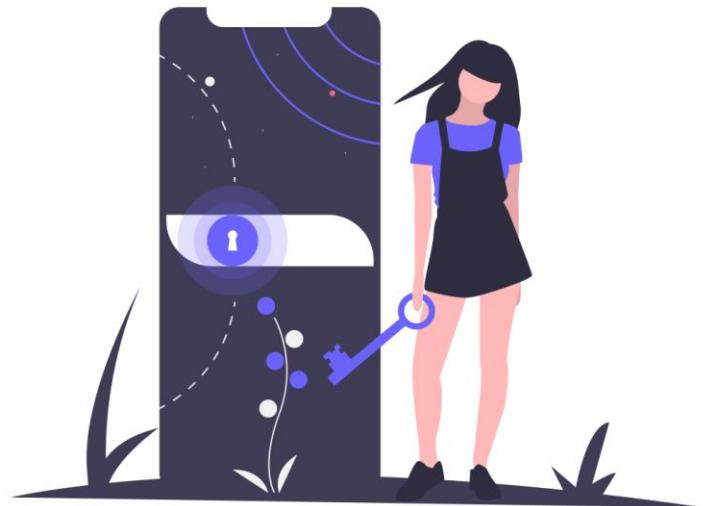

Access to Platforms

Using NFTs as keys to unlock platforms

Platforms are able to provide selective access based on whether the user owns the NFT collection. This is done by having the users connect their wallet which allows the platform to automatically detect if the wallet contains the specific NFT collection.

Such a function allows platforms to provide exclusive access only to the NFT holders with further levels of access possible based on the number of NFTs the user holds.

One example could be a live streaming platform where only holders of NFTs are able to access and watch. Or an exclusive private sale on the platform where holders of NFTs have access to.

Use Case 7

Staking for Token Rewards

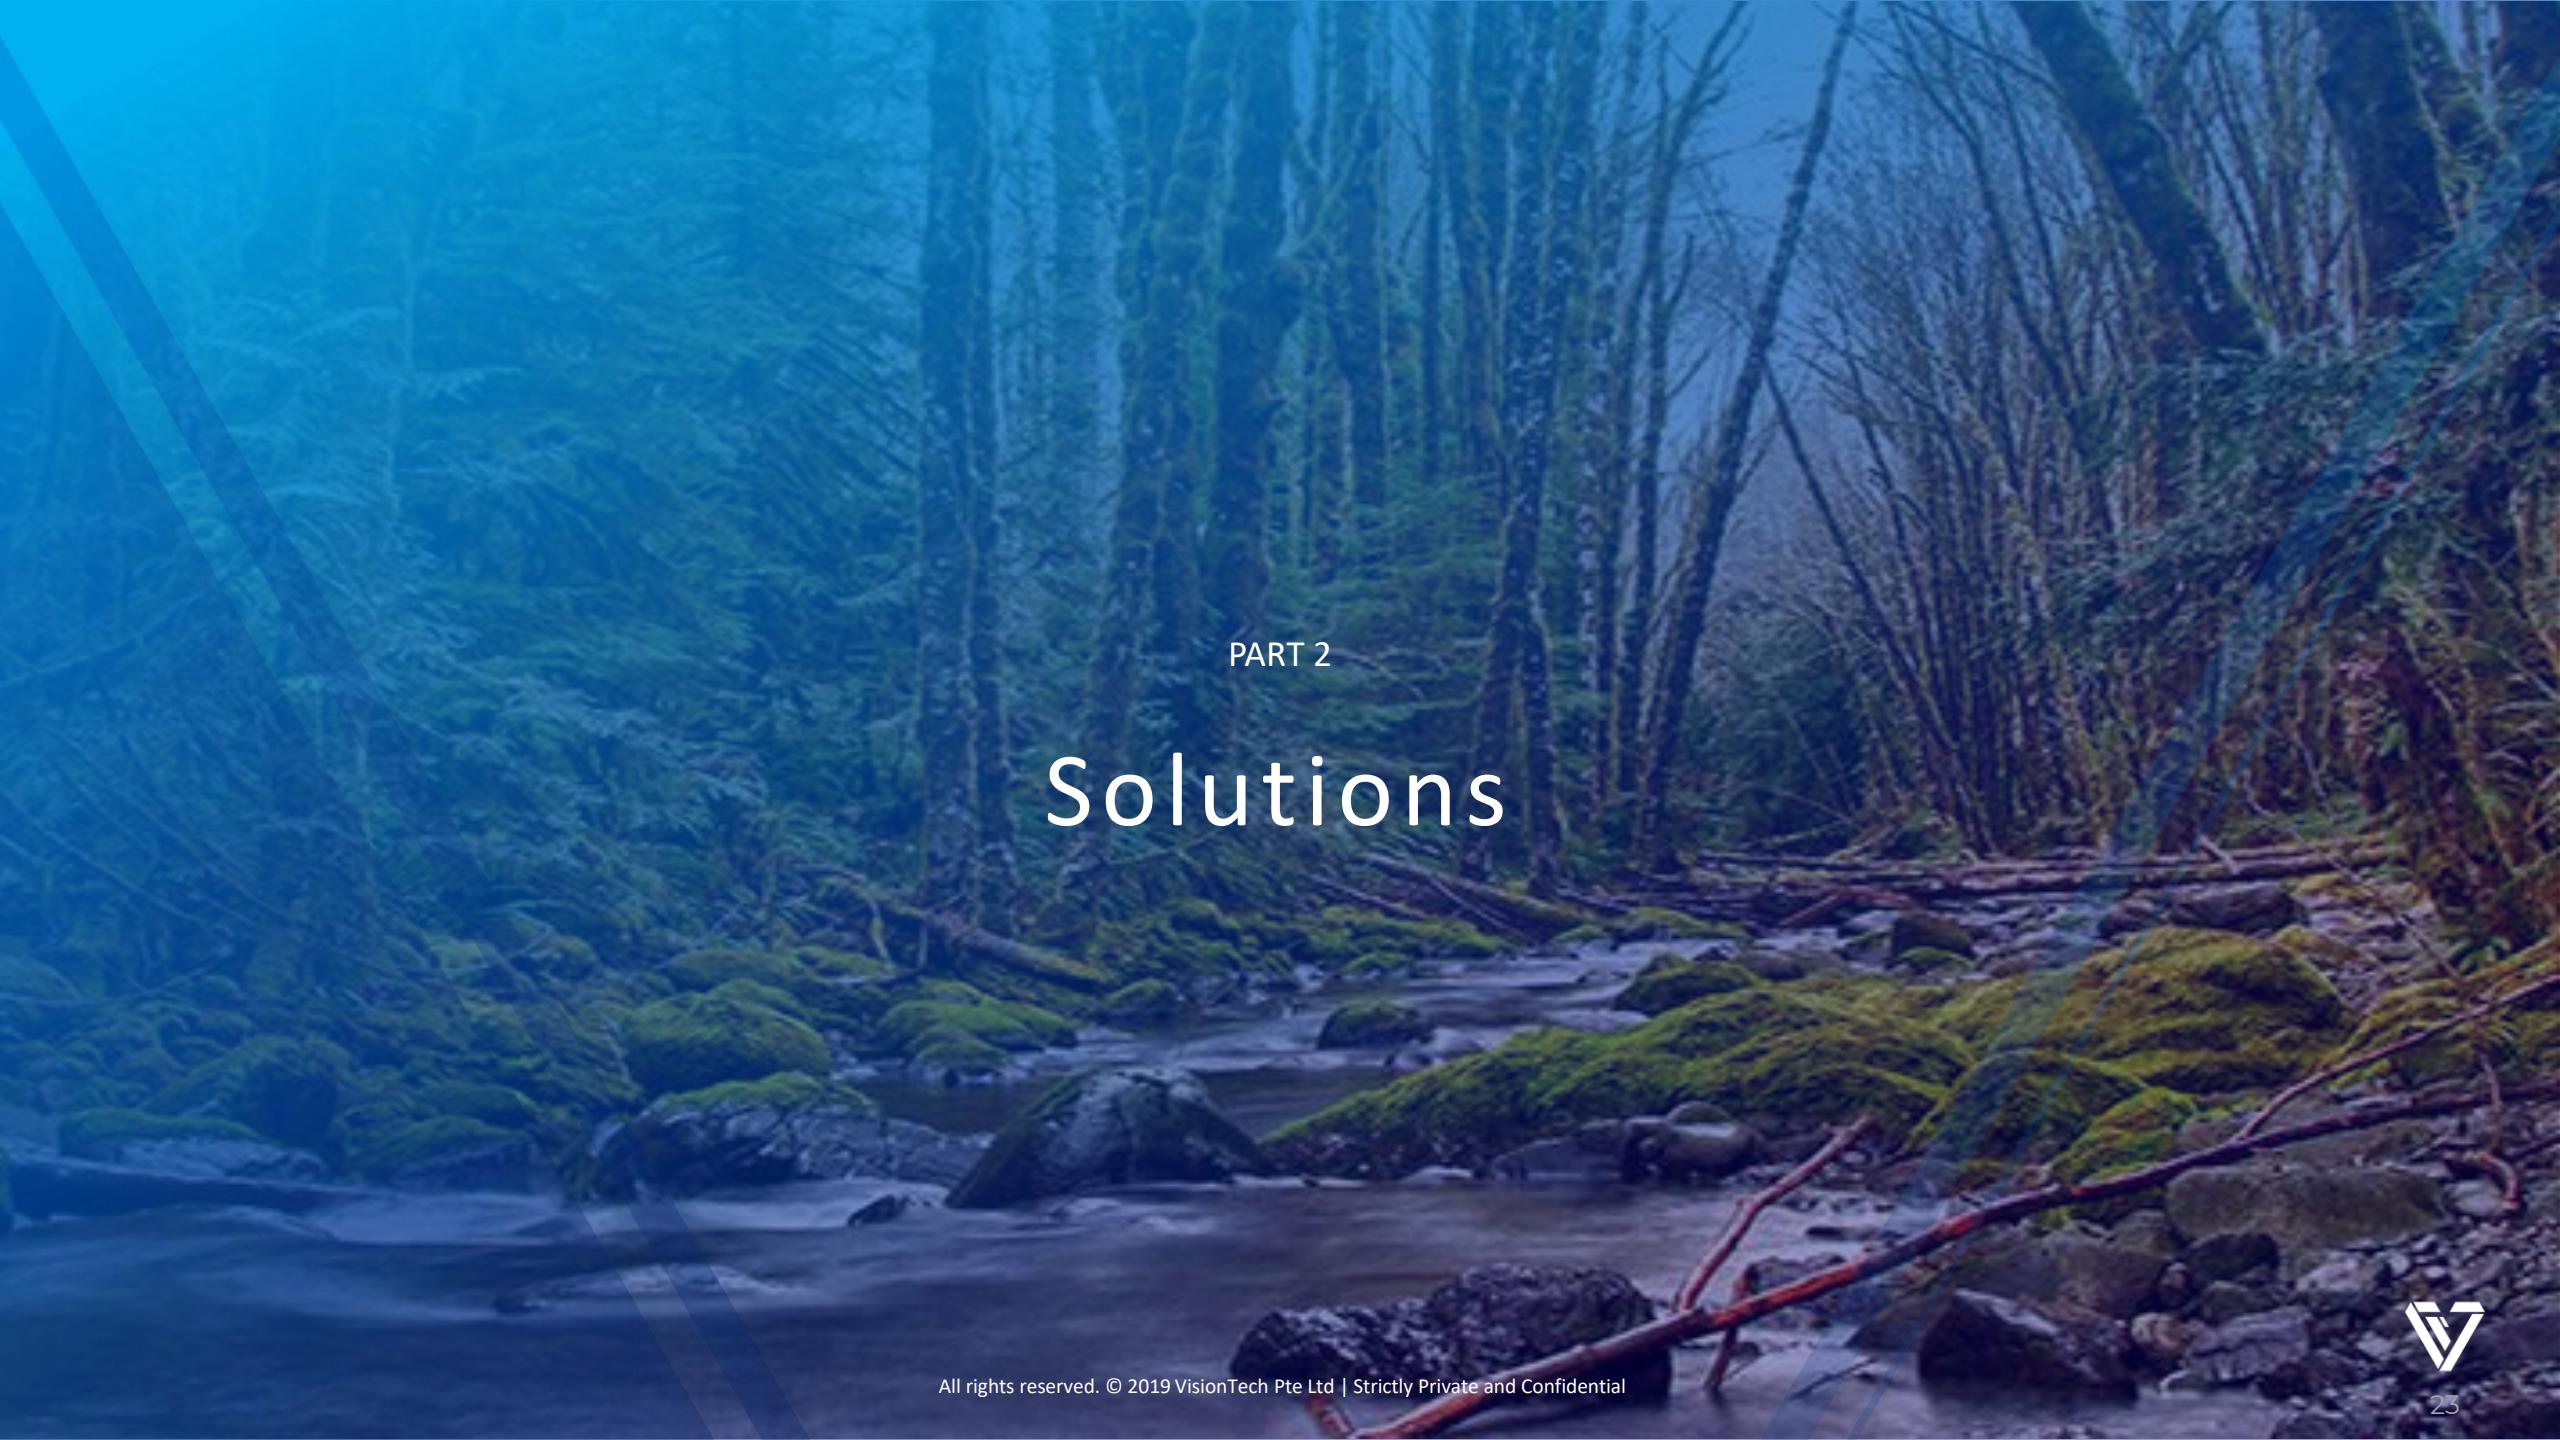

Staking of NFTs

Many projects allow users to stake their NFTs to earn rewards in the form of tokens.

These tokens can be used within the project ecosystem and be used as the native token for future implementations such as games, new NFT releases, upgrades and more.

Staking also reduces the circulating supply creating a stronger demand vs supply ratio, putting upward pressure on prices in the secondary market.

A photograph of a dense, mossy forest floor. Fallen logs and large rocks are scattered across the ground, which is covered in thick green moss. The background shows tall, thin trees with sparse leaves, creating a misty, natural atmosphere.

PART 2

Solutions

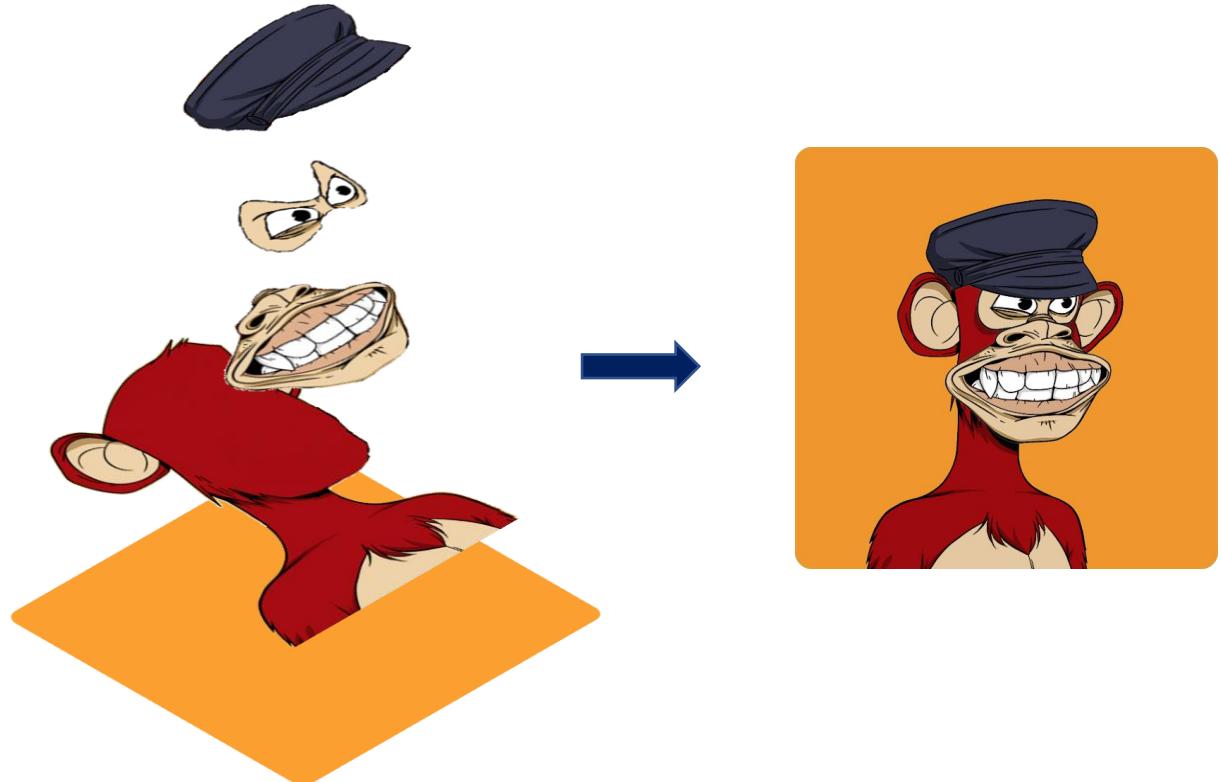

Generative Art Program

Generate thousands of unique iterations of art pieces

Programmatically generate NFT art based on layers in a zero-code environment

Create thousands of unique art pieces with just a number of art layers

Configure minimum degree of uniqueness with built-in rarity function

Smart Contract Deployment

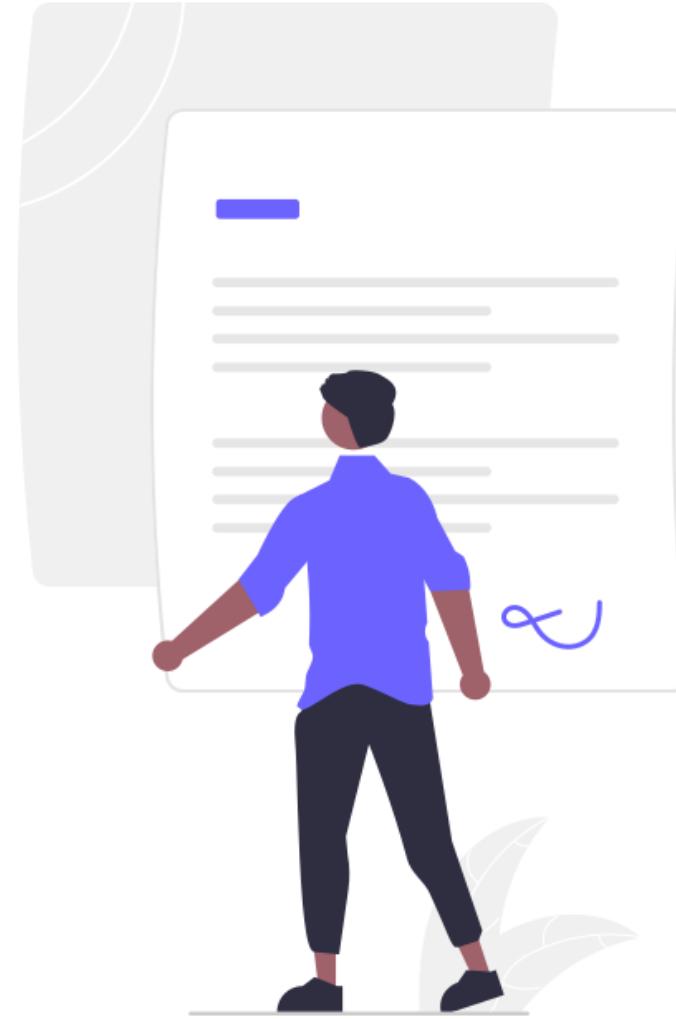

Deploy smart contract for minting of NFTs

Deploy smart contract allowing the minting of NFTs without having to know how to code

Configure prices, supply, max mint per transaction, whitelist functions and more

Optimised contract to achieve lowest gas fees for users

Use placeholders for pre-reveal and choose when to reveal

NFT Launchpad

Build your own custom drop site

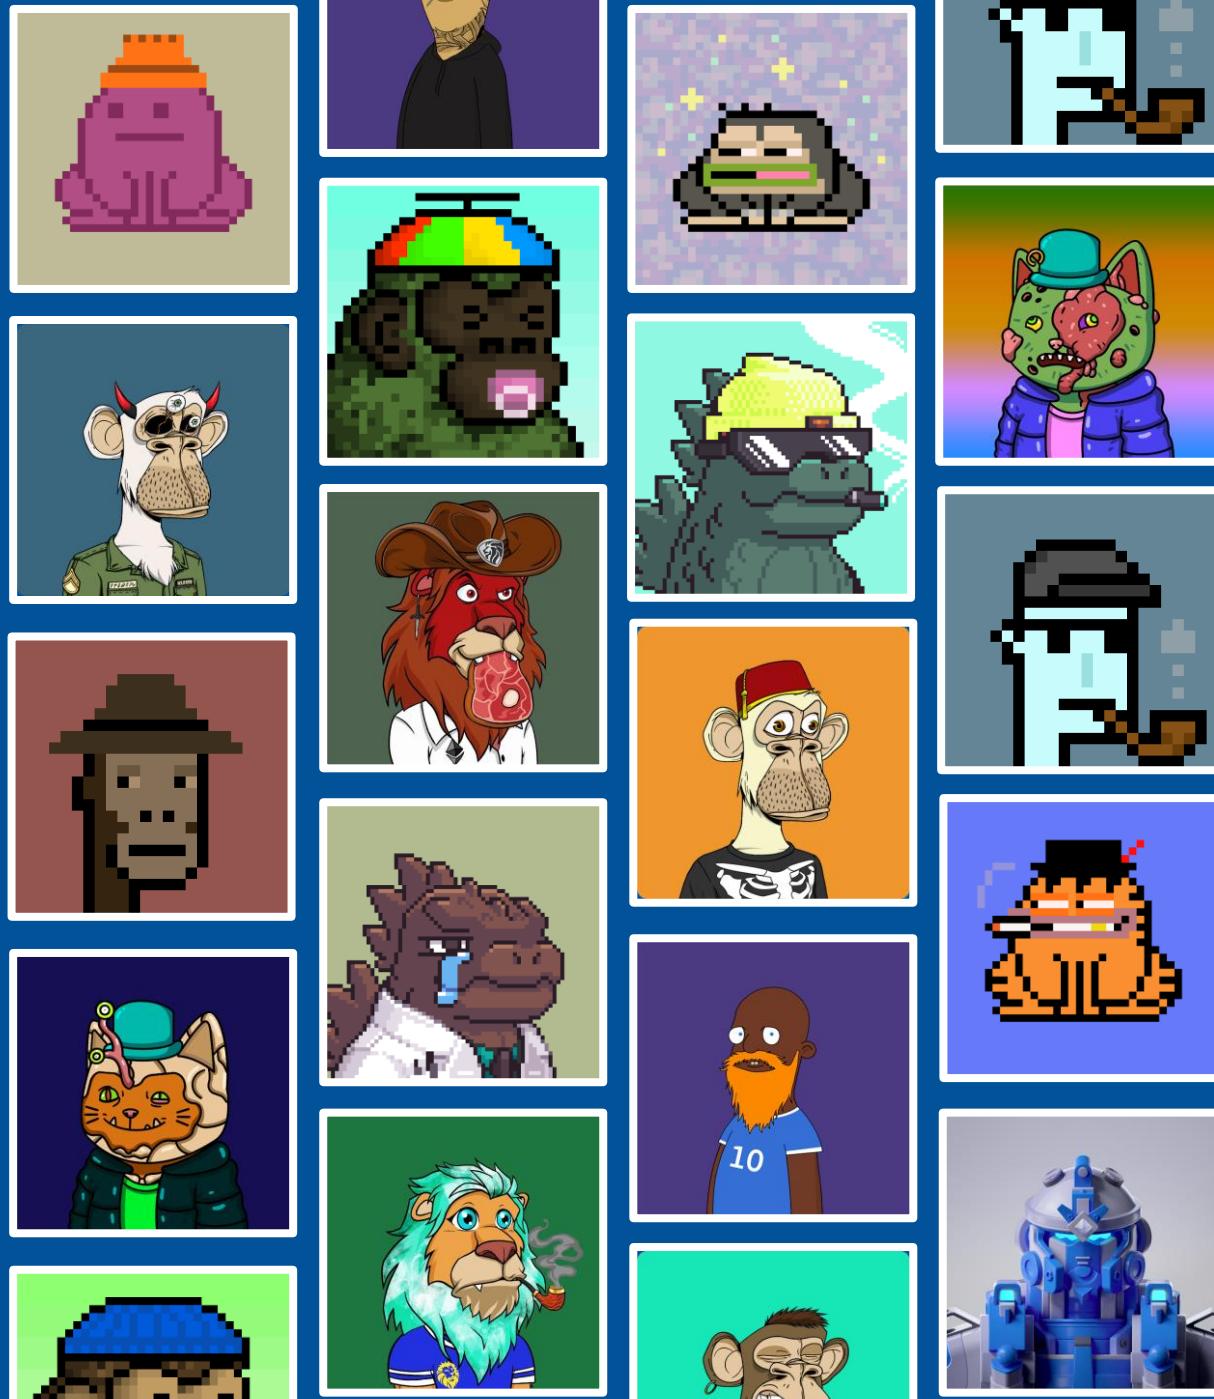

Customise your own website for your NFT drop

Be in control of the timeframe and the structure of the sale, all under your own branding and domain

Host your own secondary marketplace within your website

Earn royalties on secondary sales within your website or on other marketplaces*

*Only on specific marketplaces

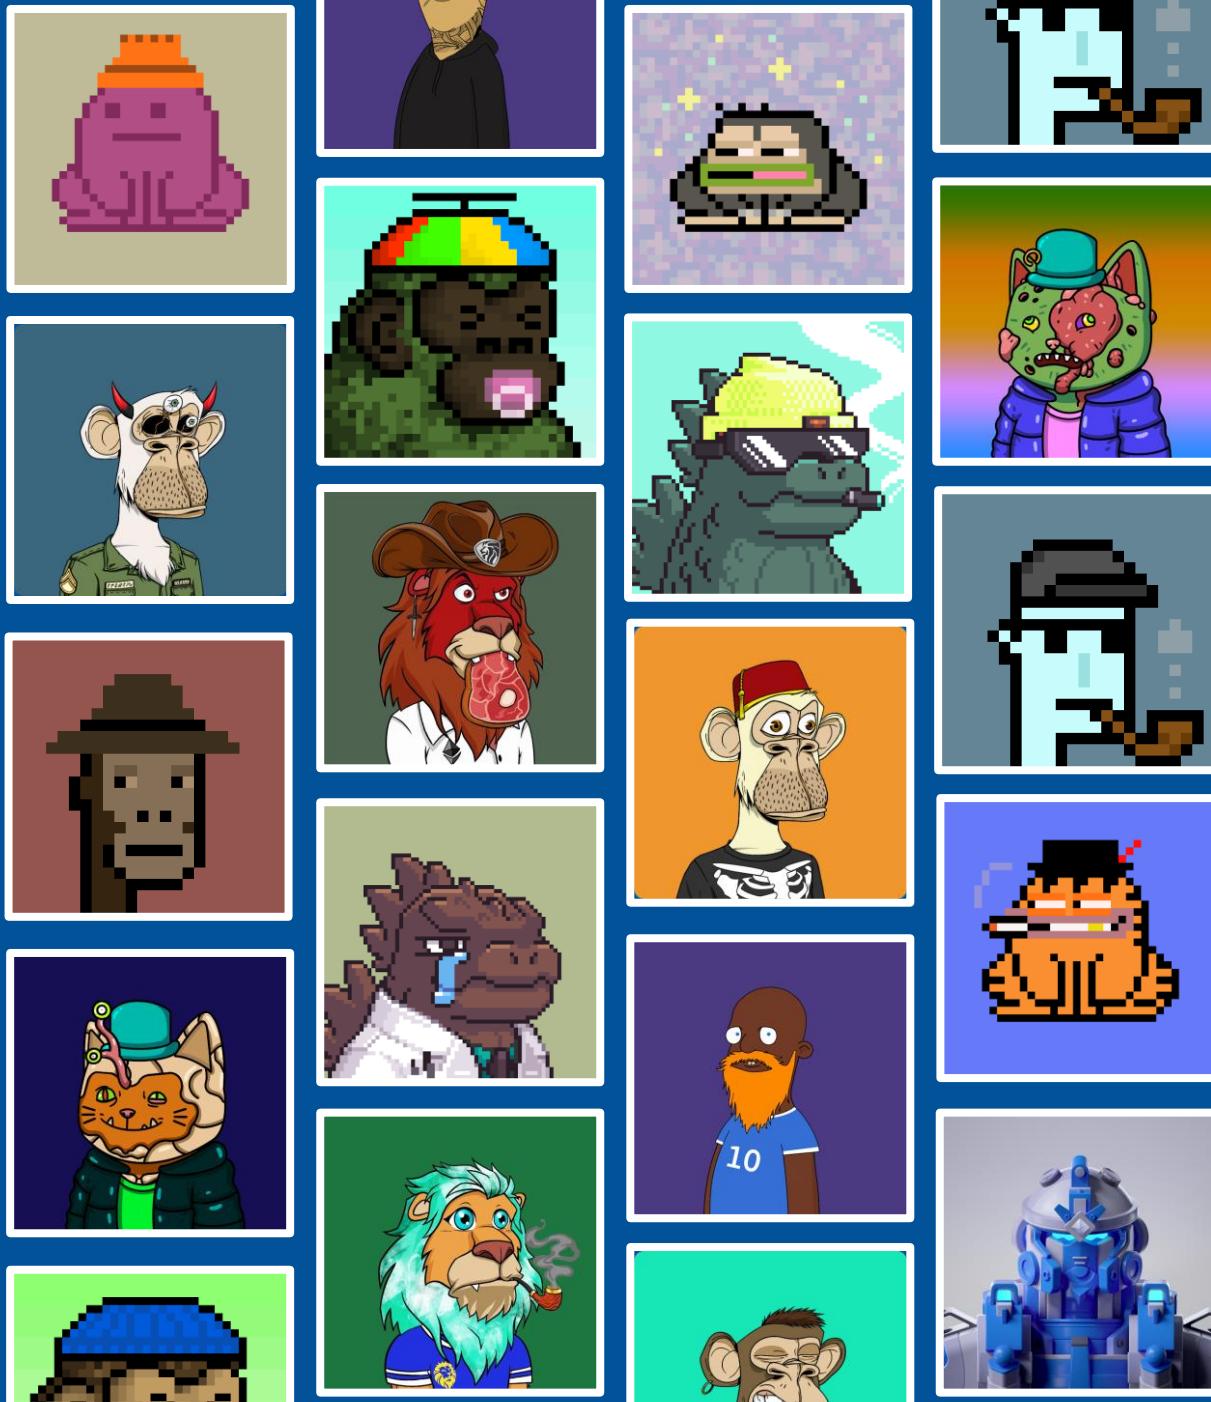

NFT Launchpad

Why build your own?

Direct to fan customized experience

- Maintain control of your brand
- Tell your story in the most authentic way possible
- Create more personalized experiences for fans/collectors
- Drop when you want, not when you get a slot
- More exclusive experience for buyers
- Hosted on a domain of your choice

NFT Marketplace

Host your own NFT marketplace

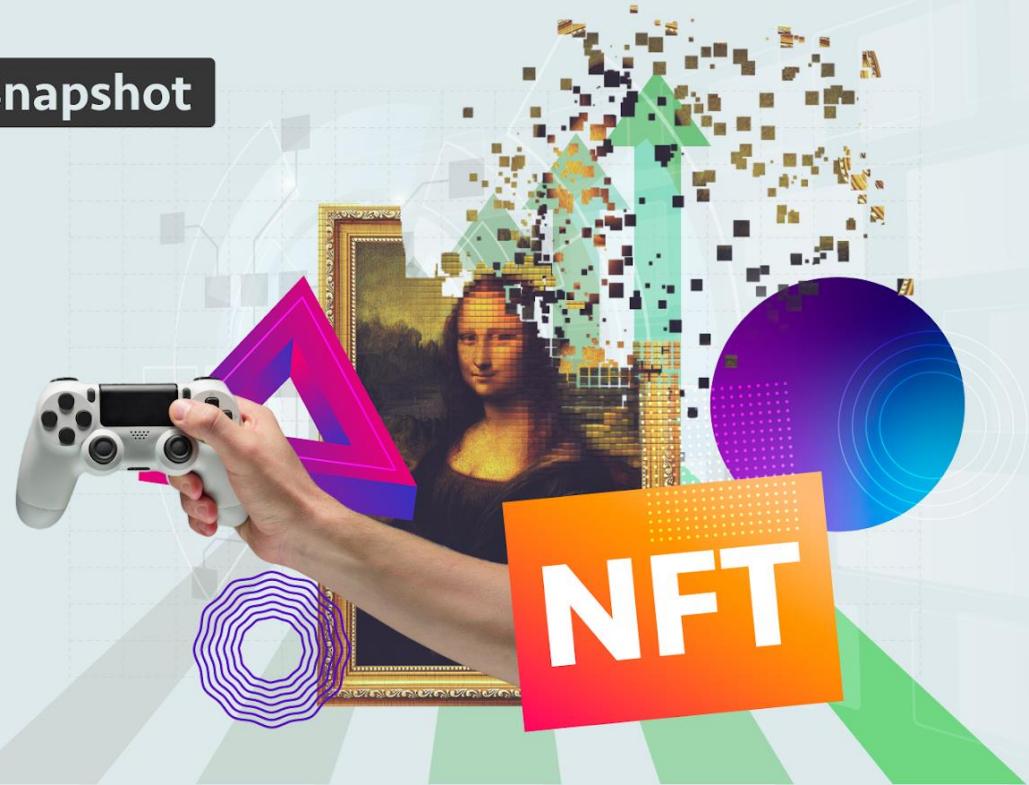

Manage a marketplace where collectors aggregate to buy and sell NFTs using fiat or crypto

Earn whenever a collector uses your marketplace to buy and sell

Empower creators to launch their work on the platform, gaining swift access to a large community

Interoperability with other NFTs marketplace

NFT Snapshot

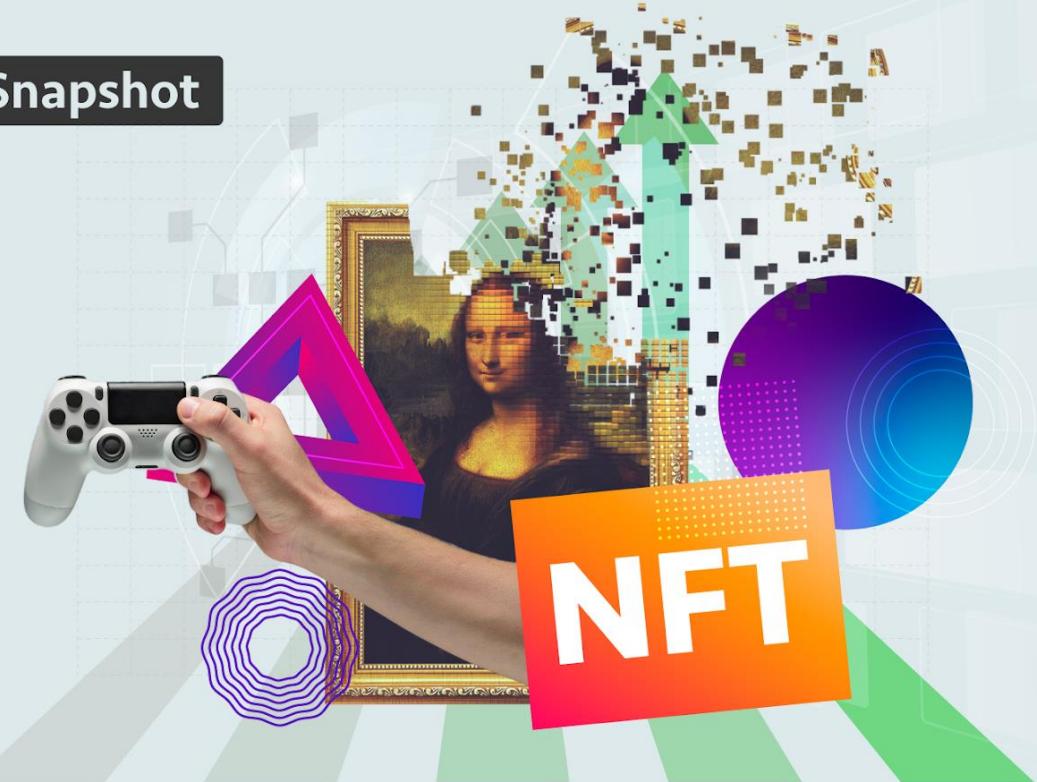

NFT Marketplace

Why build one?

Manage multiple brands and collections

- Create a go-to platform for NFT collectors
- Boost your brand through the platform
- Earn from activity within the platform
- Elevate your business through innovative digital asset ventures
- Capitalise on the booming digital asset industry

NFT Snapshot

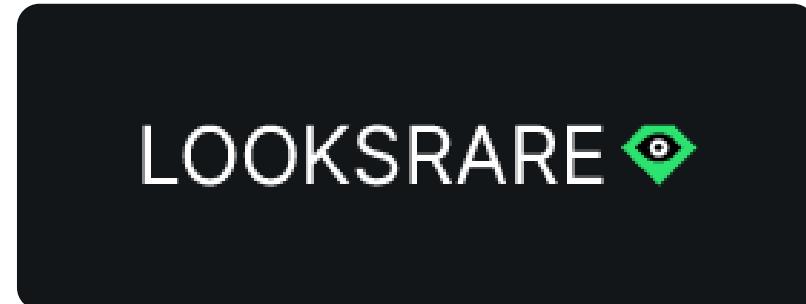

External Marketplace Integration

Integrate your collection with external marketplaces

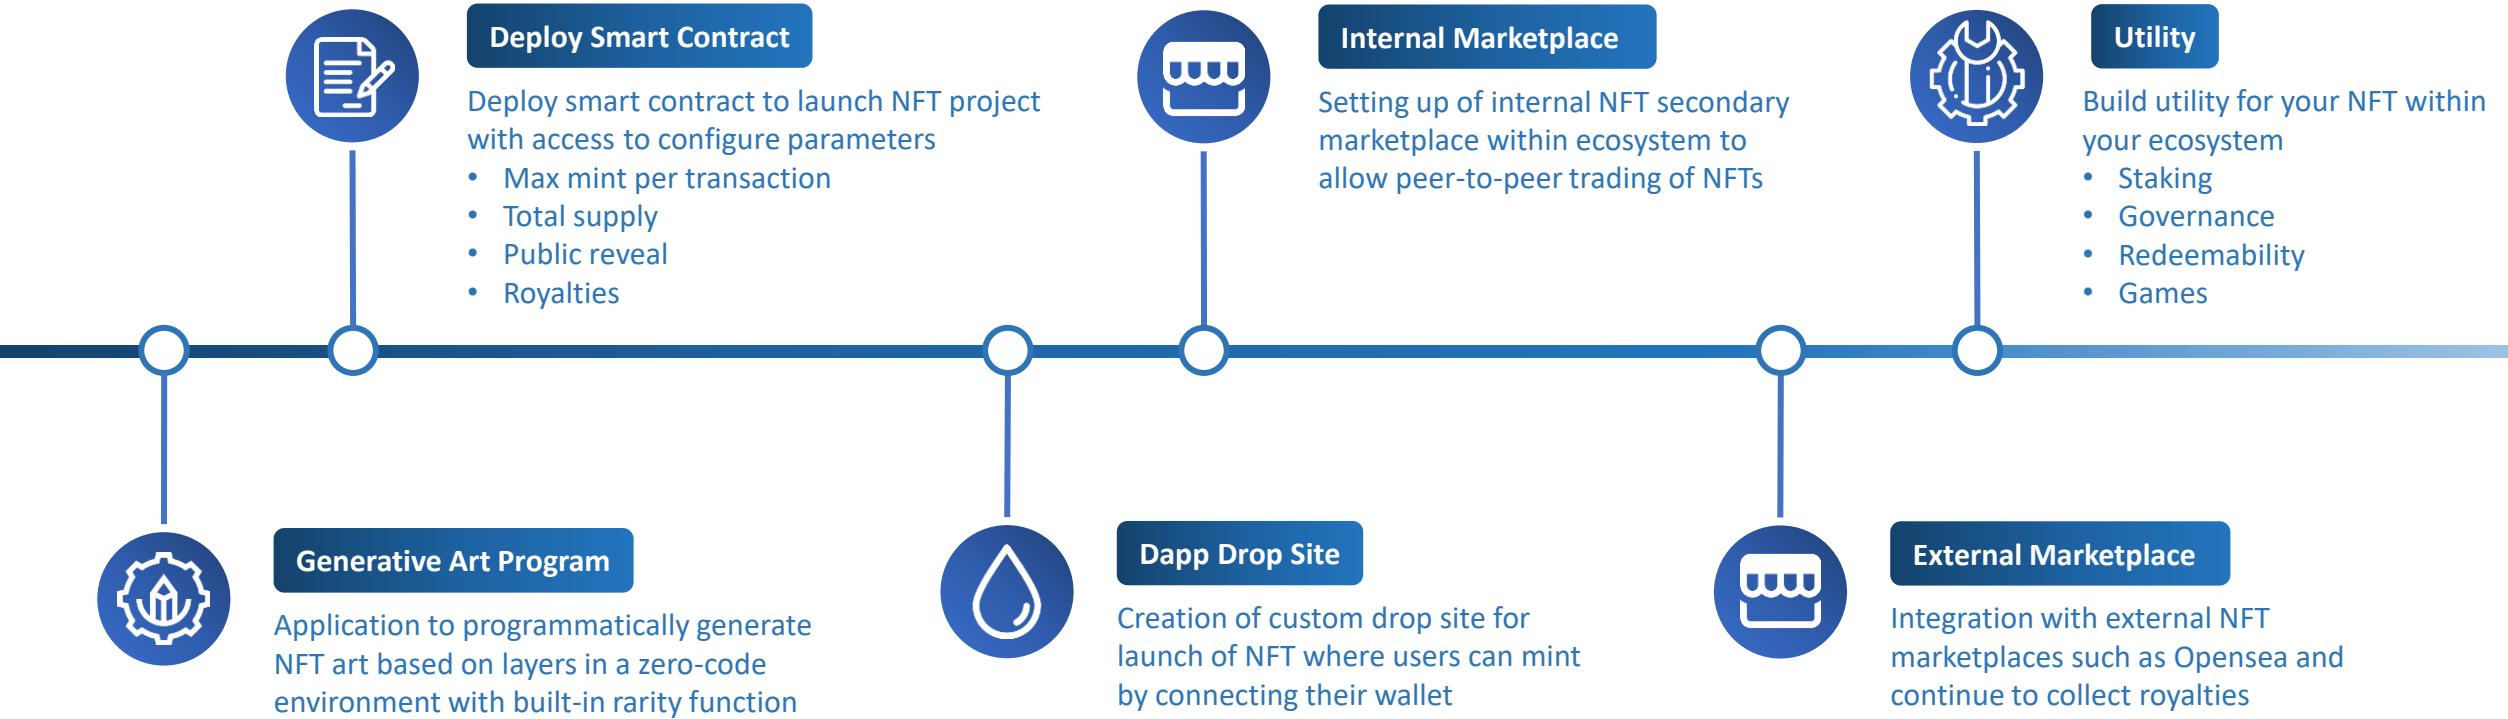

Allow collections to be integrated with external marketplaces such as Opensea and LooksRare

Gain access to extremely high traffic volume in external marketplaces to increase exposure and sales of NFT collection

Continue earning royalties while the collection trades in these external marketplaces

Proposed Roadmap of Solutions

Why Us

We Can Deliver

Blockchain experts with blockchain projects across 42 industries, having 49 use cases and 60 references under our belt.

Experience in projects from consultancy and tokenomics to token issuance, listing and solution build.

Cost optimization by designing the best model for minting, distribution and transfer of NFTs.

Demo-able solutions from past projects portraying proven, implemented and deployed technologies.

With comparison to public protocols, we provide faster, cheaper and more scalable solutions.

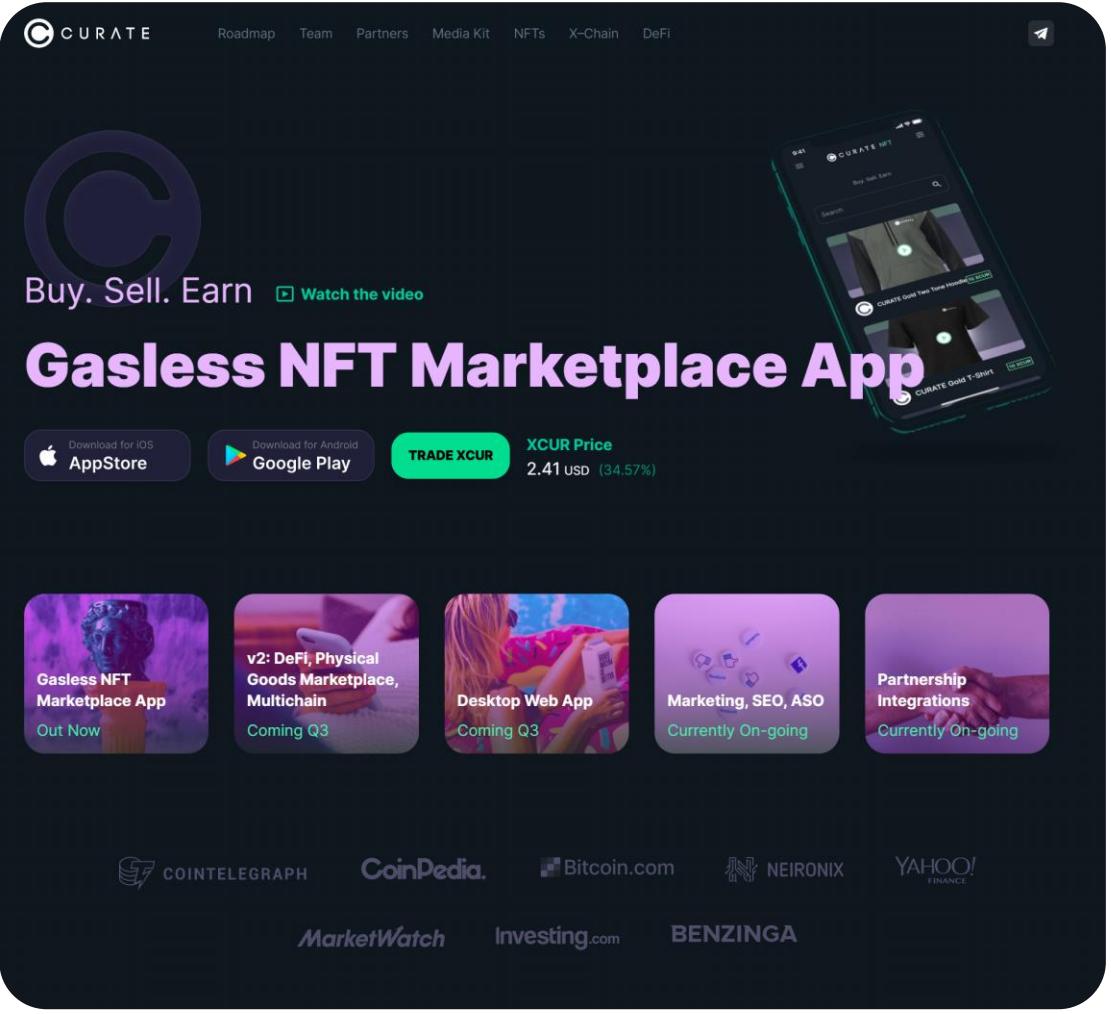

Unique NFT models like gasless NFT transactions within ecosystems and marketplaces, payment in fiat for NFTs.

The background of the slide features a complex, abstract network graph. It consists of numerous small, glowing blue dots (nodes) connected by thin, translucent blue lines (edges). The nodes are distributed across the frame, with a higher density in the center and towards the edges, creating a sense of a global or interconnected system. The overall color palette is a deep, saturated blue.

PART 3

Team Experience

Team Experience

The landing page for Curate features a large purple 'C' logo on the left. Below it, the tagline "Buy. Sell. Earn" is followed by a link to "Watch the video". The main title "Gasless NFT Marketplace App" is prominently displayed in a large, bold, purple font. Below the title are download links for iOS (AppStore) and Android (Google Play), along with a green button labeled "TRADE XCUR" showing the price "2.41 usd (34.57%)". A smartphone icon on the right shows a screenshot of the app interface, which displays a "Buy Sell Earn" screen with a search bar and a product listing for a "CURATE Gold Twin Tone Hoodie". At the bottom, there are five cards: "Gasless NFT Marketplace App Out Now", "v2: DeFi, Physical Goods Marketplace, Multichain Coming Q3", "Desktop Web App Coming Q3", "Marketing, SEO, ASO Currently On-going", and "Partnership Integrations Currently On-going". Logos for Cointelegraph, Coinpedia, Bitcoin.com, Neironix, Yahoo Finance, MarketWatch, Investing.com, and Benzinga are at the very bottom.

Curate is a blockchain agnostic **gasless NFT** and physical goods marketplace with an in-built wallet. The platform is based off ERC-20 and BEP – 20 token smart contract standard. Two of the most popular and widely used smart contract standards in the industry.

With the proprietary platform that was built, transactions made within the ecosystem of the platform doesn't require gas fees for transactions. User will only need to pay gas fees when they exits the ecosystem by transferring the tokens to their own 3rd party wallets.

The platform is also integrated with Circle, a payment gateway solution provider that facilitates the transactions between Fiat and crypto

Team Experience

Background

A NFT collection in collaboration with Cristiano Ronaldo to commemorate the launch of ZujuGP. The platform aims to elevate fan experience in football by building community-driven technology to connect fans and businesses.

Buyers are able to enjoy premium experiences such as live game experiences, training and talent services, esports, entertainment platforms and even stand a chance to meet their favourite football star.

Service Provided

- Project management, advisory and coordination
- High level recommendation on NFT tokenomics and roadmap
- Development of project plan detailing requirements and timeline
- Creation of financial model
- Provision of clarification and standard market practices for NFT projects

Team Experience

Background

A NFT collection in collaboration with a multi-million dollar sports league to launch NFTs related to the clubs and athletes in the league.

Exploration

- Creation of a seamless NFT marketplace catering to crypto non-native users
- Users are able to purchase NFTs with FIAT
- Users are able to easily transfer the NFTs into a external wallet where they are able to list in on external marketplaces for sale
- Marketplace owner is able to create and launch NFT collections in a code free environment

Team Experience

Background

A NFT marketplace that serves as a launchpad for celebrity athletes in China to release their own NFT collections.

Exploration

- Creation of a seamless NFT marketplace catering to crypto native and non-native users
- Users are able to purchase NFTs with FIAT or cryptocurrency
- Users are able to easily transfer the NFTs into a external wallet where they are able to list in on external marketplaces for sale
- Marketplace owner is able to create and launch NFT collections in a code free environment
- The NFT creators can design their NFTs with any kind of special access or perks

Team Experience

Background

A luxury wine collection that aims to create a redeemable NFT collection where users are able to claim a bottle of wine for each NFT owned.

Exploration

- Feasibility study, objective mapping and product roadmap creation
- Launch of NFT collection where users are able to purchase the newly minted NFT from a primary market sale using fiat or cryptocurrency
- Creation of a secondary NFT marketplace where users are able to trade the NFT seamlessly
- Access to future NFT releases, priority access to VIP events and unlock additional benefits across the entity
- Using the NFT as a proof of authenticity of the wine
- Engaging Baker Tilly Singapore as an auditor to authenticate that the NFTs are backed by tangible assets.

Team Experience

Background

A gaming company with past projects linked to Tencent, using advanced game rendering engine to provide users with a smooth, real-time gaming experience. The company intends to break into the metaverse gaming industry.

Exploration

- Feasibility study, objective mapping and product roadmap creation
- Launch of NFT collection where users are able to purchase the newly minted NFT from a primary market sale using fiat or cryptocurrency
- Creation of a secondary NFT marketplace where users are able to trade the NFT seamlessly
- Development of games with an entire ecosystem of NFTs and tokens

Team Experience

Background

One of the first games built on the Solana blockchain. NFTs in the game come with in-game utilities such as items, enemies, weapons, NPCs and playable characters. Each NFT can be used to redeem a physical collectible card with augmented reality features.

Exploration

- Launching a new game based on previous past experiences the team has with the success of existing project
- Feasibility study, objective mapping and product roadmap creation
- Launch of NFT collection where users are able to purchase the newly minted NFT from a primary market sale using fiat or cryptocurrency
- Creation of a secondary NFT marketplace where users are able to trade the NFT seamlessly
- Development of game with an entire ecosystem of NFTs and tokens

Team Experience

Background

A launchpad incubator for companies that are interested in using NFTs as a virtual investment asset tagged to real life assets, where investors who own the NFT have partial ownership of the investment asset tagged.

Exploration

- Feasibility study, objective mapping and product roadmap creation
- Launch of NFT collection where users are able to purchase the newly minted NFT from a primary market sale using fiat or cryptocurrency
- Creation of a secondary NFT marketplace where users are able to trade the NFT seamlessly after the vesting period
- Tagging of NFTs to real life investment assets
- Exploration of future utility for NFTs in future roadmap
